U. S. TIRES
America's Smartest, Longest Wearing Tire,
Built With Tempered Rubber--Was Chosen
By Dr. De Zita In His Blind Fold Auto Drive
Saturday, June 11.

U. S. Tires now have the toughest, longest-wearing rubber compound ever put into the tread of a tire. It is so slow to wear—so much more resistant to cuts and punctures—so much safer and more economical, it is distinguished from other compounds by the new name—TEMPERED RUBBER. Dr. de Zita who will drive the new Pontiac, while blindfolded, through the streets of Lubbock Saturday, demanded U. S. Tires, because of their safety and sureness of traction.
