The US Genweb Archives provide genealogical and historical data to the general public without fee or charge of any kind. It is intended that this material not be used in a commercial manner. All submissions become part of the permanent collection.

Burial list of Washington State Veterans Home Cemetery transcribed and submitted by David Ebbert November 2002. Both above notices must remain when copied or downloaded.

The Washington State Veterans Home cemetery records was compiled by Teresa Trimm of the Veterans home. The index list is assembled from office documents and has not been verified at the cemetery. A very large vote of thanks is due Teresa for the many hours spent in assembling this data.

The stones themselves contain very limited information. The name of the veteran and his military unit with occasionally his rank and war he fought in. Often the veterans spouse's tombstone includes the birth and death date.

The index files provide an alphabetical listing of the interred individuals with cemetery section, lot number and death date when available. As the information is verified at the cemetery, section files will be added showing tombstone data. Often husband and wife will be buried side by side, consequently this file will be indexed in the sequence found at the cemetery.

Normally the maiden name of the spouse is not available in this record. Also be aware the term widow does not mean the husband died before the wife.
